CONSTRUCTION SERVICES

Experience and Innovation Working for You

A service Mid-South offers to our clients is a representative on-site during construction. Clients find this person to be an invaluable resource in coordinating subcontractors and providing interpretation of the design to ensure the design is properly executed without unnecessary delays.

A field representative will review overall layout, specific equipment and building layout prior to pouring of concrete, special or heavy equipment settings, and final alignments of critical areas of equipment placement. They can monitor the construction schedule in all phases of the project, provide recommendations, and assist in obtaining data necessary for compliance or adjustment of schedule as deemed appropriate by the Owner or Engineer.
