Professional Memberships

Mid-South Engineering's Mechanical Department provides a wide array of services to support clients' needs from upgrading a single piece of equipment to complete green field facility design. Our Process Engineers work closely with our Mechanical Engineering and Design team to make sure the equipment and systems will meet the client's requirements. Combining innovative design tools and practical experience, we help our clients optimize opportunities, increase return on investment, and develop a product of superior quality.

What We Do:

Engineering, Design, & Specifications:

- Energy & Mass Balance
- Process Equipment
- Bid Analysis
- Material Handling
- Fire Protection
- Process Flow Diagrams
- Custom Equipment
- General Arrangements
- Pneumatic Systems
- Piping Systems

International Paper

The Mechanical Department work closely with Mid-South Engineering's Site Development, Structural, and Electrical Departments to support our core industrial markets. We also offer Engineering Support Services for custom equipment manufacturers, re-engineering of equipment to correct deficiencies or increase functionality, as well as detailed designs for one-offs and prototypes.

Programs Used:

- AutoCad
- Internal QA/QC
- Adept Document Control
- Proprietary System Modeling Using Excel
- 3-D Design Using Inventor
