Professional Memberships

Mid-South Structural Engineering Department provides complete design and analysis services for all structural elements. These services include original structural designs complying with current Codes, industry and project specific standards, analysis and remedial design to accommodate new loading conditions, to address degraded structural conditions, or to facilitate repurposing of existing facilities.

The structural department works closely with Mid-South Engineering's Site Development, Mechanical and Electrical Departments as well as owners and contractors to provide responsive, practical and economical structural designs.

- Residential Buildings
- Institutional Buildings
- Industrial Structures
- Steel Structures
- Building & Equipment Retrofit
- Commercial Buildings
- Industrial Buildings
- Masonry Structures
- Bridges
- Trusses
