Professional Memberships

Mid-South has a full team of engineers who each have three decades and more of experience working for pulp and paper mills as maintenance engineers, maintenance supervision, operations management, and capital projects engineering. We also have engineers with extensive environmental and energy infrastructure experience for pulp and paper companies.

Our staff members have worked on projects in all areas of pulp and paper mills, including fiber yards, mechanical pulp mills, Kraft pulp mills, recovery plants, power generation, bleaching, stock preparation, coated publication papers, un-coated papers, tissue machines, and finishing.

Mid-South Engineering understands state-of-the art Pulp and Paper Systems. From design to installation to operation, we have developed the expertise to get your next project to full capacity on budget and on time. Mid-South will be your design partner that engineers what you want.
